

# ADITI JHA

B.TECH GRADUATE IN COMPUTER SCIENCE

## PROJECT

### PINTEREST APP CLONE

Developed a pinterest app clone using node.js , ejs , css, multer etc, where a user can register and login ,for this authentication and authorization process i used the standard passport authentication code. Once the user login has created profile they can even upload the images and write caption for it , the uploading process was coded using multer.

### CLONE OF APPLE VISION WEBSITE

Developed using HTML , CSS and javascript, the website contains many animation coded using canvas standard. The javascript DOM is the core technique used to design whole website.

## TECHNICAL SKILLS

Java programming language	HTML
